

CAN THESE TINY C-GROOVES HONESTLY MAKE A  
HUGE DIFFERENCE IN HOW WELL ONE PUTTS?

A blurred photograph of a golf green with a hole in the foreground, set against a background of trees and a clear blue sky. The image has a motion blur effect, giving it a sense of movement. The green is a vibrant green, and the hole is a dark, circular opening. The trees in the background are dark and out of focus, and the sky is a clear, light blue.

*“To A Ball That Is Skidding Or Bouncing—No Matter How Subtly—Even The Most Meticulously Manicured Green Becomes A Corrugated Obstacle Course.”*

## *Mr. Harold Swash knows a little bit about putting.*

*Indeed, for over 40 years he's been quietly teaching its art and science throughout Europe, including to many of the Ryder Cup players.*

*When he isn't tutoring pros he's often out in his shop testing ways to improve club design. It's this unique combination of first-hand putting expertise and incessant re-engineering that lead to his truly unusual putter face configuration he dubbed the "C-Groove."*

*We know. The golf landscape is cluttered with whiz-bang technology that's "guaranteed to improve your game!!!" We also know, the vast majority of these "breakthroughs" flat don't work.*

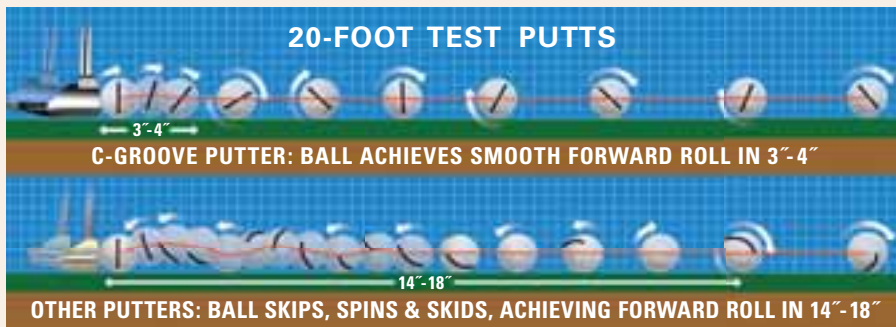

*But then, none of them are the brainchild of the man affectionately known worldwide as the "Putting Doctor." And none of them have changed the short game of so many golfers, so many pros, on so many courses.*

*So, why and how does the C-Groove work? Glad you asked. . .*

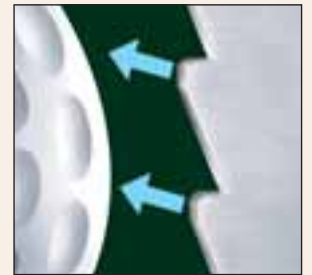

# SMOOTH, EARLY ROLL IS THE SECRET TO A STRAIGHTER, TRUER LINE. AND C-GROOVE IS THE SECRET TO A SMOOTH, EARLY ROLL.

*That's worth re-reading. The first several inches a putt ball travels is critical. Traditional putters cause it to loft, spin and skid often up to 18 inches which makes the ball far more likely to deflect from a perfect line. The slightest aberration on the green can cause a major alteration of its direction.*

*But what if the ball could be struck in such a way that it began rolling forward virtually upon impact? Little or no skipping and spinning?*

*This is precisely what the concentric C-Grooves do. With their upward slant, the edges contact the ball and lift the back, imparting an over-the-top rolling action immediately.*

*This isn't just theory, it's been borne out in computer controlled, high speed video tests conducted independently. As the illustrations show, C-Groove-*

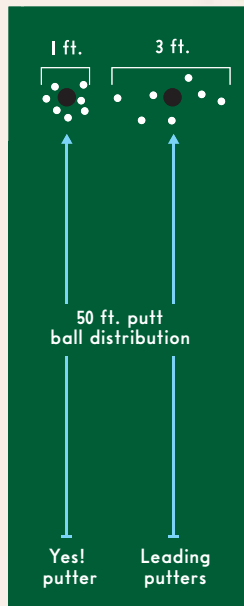

*struck balls start rolling forward up to six times sooner than balls struck identically with other top brand putters. All of which translates into a*

*truer line, more consistency, lower scores.*

*There's another way to demonstrate the dramatic difference smooth, early roll can make. Take an equal number of identical golf balls, place them on the same surface and hit them identically with a robotic putter from 50 feet out.*

*So, the only variable is the club doing the hitting.*

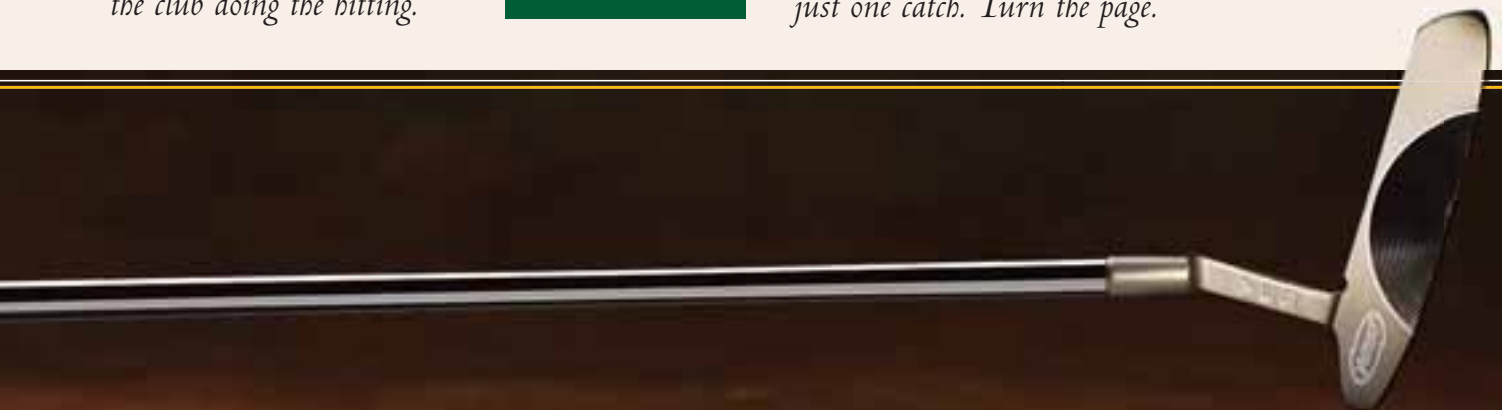

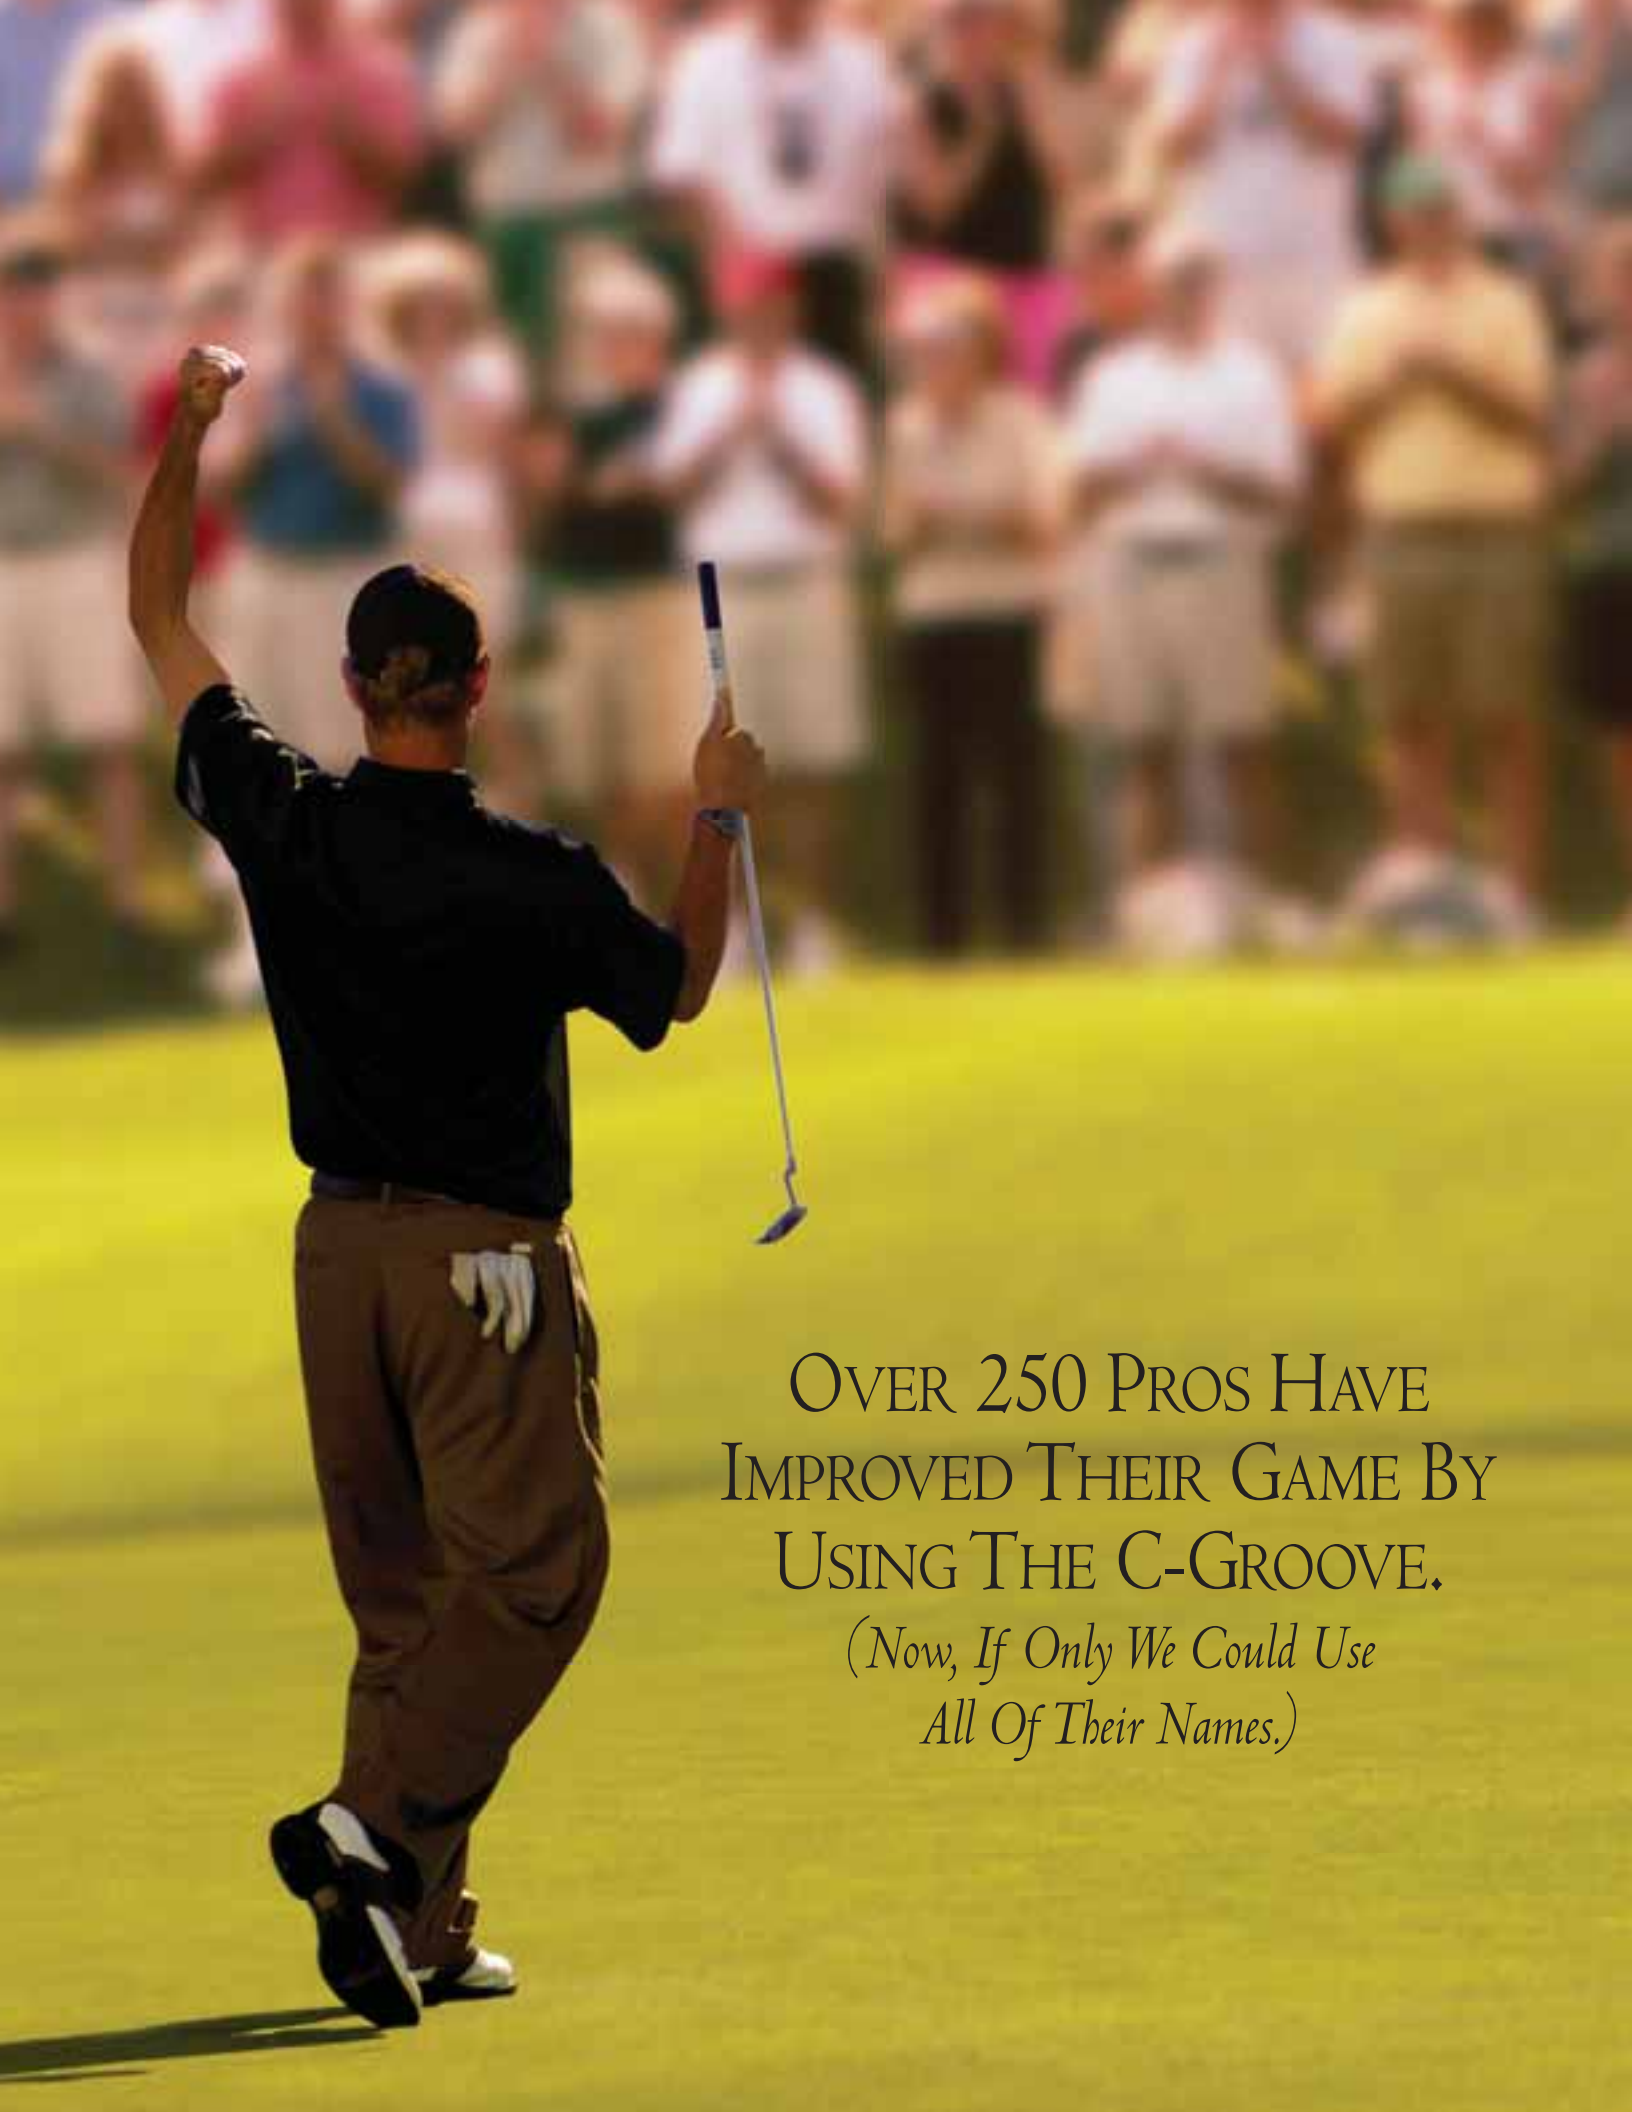

*Ours vs. theirs.*

*Results?*

*Well, invariably, the groupings of balls hit with C-Groove putters wound up tighter and closer to the hole. Up to three times closer. Rather convincing, huh?*

*So, if this technology makes such a difference are many pros using it? Affirmative. There's just one catch. Turn the page.*

OVER 250 PROS HAVE  
IMPROVED THEIR GAME BY  
USING THE C-GROOVE.

*(Now, If Only We Could Use  
All Of Their Names.)*

**CHRISTINA KIM**

*What's more meaningful to a pro than fat endorsement checks? Answer: fat tournament checks. So even though we can't pay pros to use our clubs as the big brands do, more and more pros use them anyway. Because they pay by performing!*

*Unlike most club brands, putting is all we do. We live, breath, eat and sleep it. And touring pros are now beginning to appreciate what this specialization can do for their game.*

*As this catalog went to press over 300 pros around the world are saying yes to Yes! Some are very big names — men and women — but we can't reveal them all since we aren't paying them all.*

*But watch tournaments closely. Look for the C-Groove, the black & yellow grip, or for a drained 30-footer and a fist pump followed by the shouting of our name.*

# THE MOST PRECISE CLUB IN YOUR BAG IS A PUTTER. IT SHOULD BE FITTED ACCORDINGLY.

*Ironically, many golfers grab a putter off the rack and play with it as is. Yet it's the most refined instrument of the game. Besides converting to a C-Groove, the second most helpful thing one can do for their putting is make sure they have it custom-fitted to them properly, based on four key factors.*

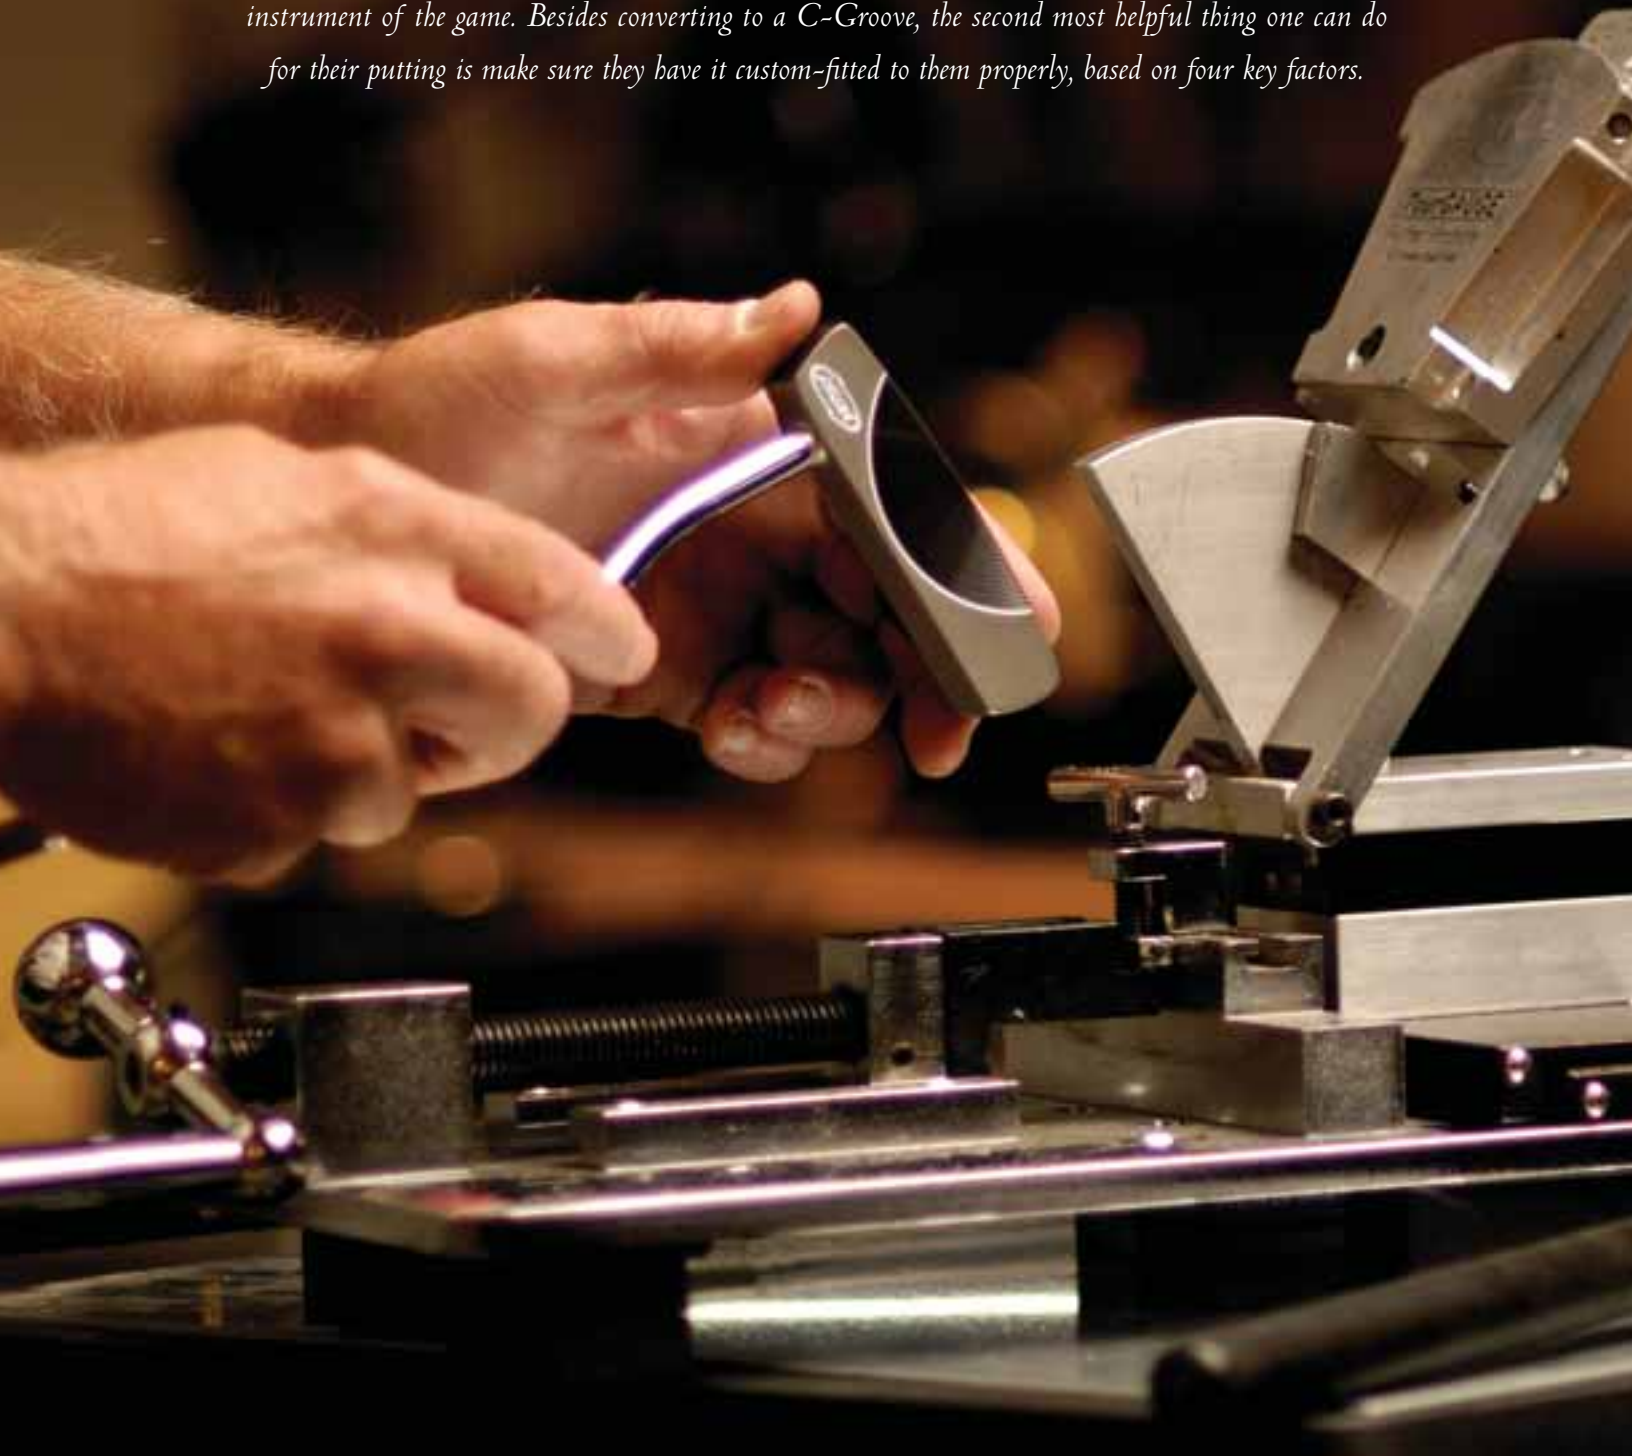

Figure 1

**Length** is the first and most important element of a good fit. When addressing the ball with the correct posture, the putter length should allow the player's eyes to be positioned directly over the ball. The ball, eyes and target should all be on the same line (see fig 1).

Correct putter length allows the player to set up consistently with a comfortable posture — helping them to clearly see their intended target line. A combination of good posture and visual information means better consistency and increased confidence.

Figure 2

**Lie** is the angle of the sole of the putter relative to the surface of the green (see fig 2). The sole should be parallel to the putting surface at address

to insure the “sweet spot” of the club lines up consistently with the center of the ball's mass at impact. This will lead to repeated solid impact, resulting in better distance control and accuracy.

**Design** or head style selection consists of two factors.

First, a putter should have a good feel, with optimal weighting for an individual's putting path (see figs 3-5).

Pronounced Arc

Figure 3

Moderate Arc

Figure 4

Straight Back-Through

Figure 5

Secondly, a putter needs to fit the player's eye and instill confidence. Both look and feel should be considered together to enhance the repeatability of an individual's putting action. To truly fit a player, the putter should be functional and attractive.

The shape of a putter's arc indicates the amount of **Toe Hang** recommended for a player's putting motion. The more pronounced or “rounded” the arc, the more weight is needed in the toe of the club to help the face return to square at impact.

**Loft** is designed to lift the ball up and out of its resting depression and start it rolling true. If the degree of loft is too small, the ball will be driven into the green and then pop up, making distance control difficult. If the degree of loft is too much, the ball will launch into the air and not begin rolling efficiently. In either case, the distance control and accuracy of the putt will suffer.

The ideal putter loft is set at a value that creates an immediate, over-rolling motion after impact. Yes! patented C-Groove putters start the ball rolling sooner at the desired target than any other putter of equal loft.

# WHICHEVER PUTTER HEAD STYLE YOU LIKE, THERE'S A C-GROOVE VERSION YOU'LL LOVE.

*Classic blade putters, high-tech face-balanced, center-shafted mallets, heel-shafted cavity back — name your poison, there's likely a C-Groove version now available. All, incidentally, designed and refined with the generous help of countless tour players.*

*For those who seek a blend of tradition and technology, our Sophia, Nicky, Tracy II and other cavity-back blade models are ideal. And for 2008 the Callie and Tracy are available in forged carbon steel.*

*Prefer a more geometric, face-balanced design? There are 14 C-Grooves to choose from this year including our new Tracy fc, Donna hybrid head, Valerie and more. These unique, perfectly balanced shapes offer precise sight lines plus remarkable forgiveness, which equals calming confidence.*

*Some like it straight down the middle, so we've expanded our center-shafted line-up to five models. Some with large, forgiving heads like Hanna and Natalie have extra long sight lines, while Amy and Carlyne offer more traditional approaches. And for those who want the added steadiness, four center-shafted models come in long or belly length.*

*Peruse these pages closely. For fit, features and specs. We offer an increasingly wide array of designs, all with one uncommon element in common: the amazing innovation of Mr. Harold Swash.*

*Because in putting, as in life, "different strokes for different folks" rings true. But with a C-Groove you can be sure it'll be fewer strokes.*

# Nicky

*Heel-Shafted, Traditional Blade*

**FEATURES:** Offset hosel. Classic look with ferrule. 304 Stainless steel with Chromium plated grooves and sole.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	350g	Offset	RH	2.5

**RECOMMENDED FIT:** *Pronounced Arc*

# Sophia

*Heel-Shafted, Traditional Blade*

**FEATURES:** Over Hosel Shaft. Titanium-Carbon Finish. 304 Soft Stainless Steel Head.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340g	Offset	RH or LH	2.5

**RECOMMENDED FIT:** *Pronounced Arc*

# Callie

*Cavity Back, Traditional Blade*

**FEATURES:** *Plumber Connection Hosel. Titanium Carbon Finish. 304 Soft Stainless Steel Head.*

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Offset	RH or LH	2.5

**RECOMMENDED FIT:** *Moderate Arc*

# Callie-f & fc

*Callie-f: Cavity Back, Traditional Forged Blade*

**FEATURES:** *One-piece Forged Manganese-bronze. Soft Forged Responsive Feel. Non-glare Finish.*

*Callie-fc: Cavity Back, Traditional Forged Blade*

**FEATURES:** *Plumber connection Hosel, Traditional cavity-back blade. One piece forged 1035 Carbon steel head. Ultra-soft feel. Rich, Ni-Ni (Nickel) plate on grooves and sole.*

PUTTER	LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Callie-f	Regular 32"-37"	355g	Offset	RH	2.5
Callie-fc	Regular 32"-37"	360g	Offset	LH	2.5

**RECOMMENDED FIT:**  
*Moderate Arc*

# Tracy II

*Cavity Back, Traditional Blade*

**FEATURES:** *Slightly Offset Hosel. 304 Soft Stainless Steel Head. Titanium Carbon Finish.*

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340g	Slight Offset	RH or LH	2.5

**RECOMMENDED FIT:** *Pronounced Arc*

# Dianna

*Cavity Back, Traditional Blade*

**FEATURES:** *Variable Weighting System.*

*Traditional Blade Appearance. Slant Neck Hosel.*

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340-370g	Slight Offset	RH	2.5

**340-355-370g Weighting Sets**

**RECOMMENDED FIT:** *Moderate Arc*

# Abbie-forged

*Cavity Back, Traditional Blade*

**FEATURES:** *Slant Neck Hosel. CNC Milled.*

*Forged 1025 Soft Carbon Steel Head.*

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Straight	RH	2.5

**RECOMMENDED FIT:** *Moderate Arc*

# Tracy

*Cavity Back, Traditional Blade*

**FEATURES:** *Face Balanced. Double Bend Shaft.*

*304 Soft Stainless Steel Head.*

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340g	Double Bend	RH or LH	2.5

**AVAILABLE IN PINK.**

**RECOMMENDED FIT:** *Straight Back-Through*

# Tracy-fc

Double Bend Shaft, Face-balanced.

**FEATURES:** One Piece Forged 1035 Carbon Steel Head.

Ultra-soft Feel. Non-glare Gray Finish.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	360g	Double Bend	RH	2.5

**RICH, NI-NI (NICKEL)  
PLATE ON GROOVES  
AND SOLE.**

**RECOMMENDED FIT:** *Straight Back-Through*

# Donna

Double Bend Shaft, Face-balanced.

**FEATURES:** High MOI Cavity Back Blade Design For

Extreme Forgiveness. Anodized Grooves.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Double Bend	RH	2.5

**HYBRID HEAD  
DESIGN—AIRCRAFT  
GRADE ALUMINUM FACE  
WITH 304 STAINLESS  
BACK WITH TITANIUM  
CARBON FINISH ON BACK  
AND SOLE.**

**RECOMMENDED FIT:** *Straight Back-Through*

# Valerie

Face-balanced Mallet Head

FEATURES: 304 Stainless Steel Head.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Double Bend	RH	2.5

RECOMMENDED FIT: *Straight Back-Through*

# Marilyn

Face-Balanced Cavity Back Mallet

FEATURES: Perimeter Weighted. Three Squaring Lines.  
Double Bend Steel Shaft. 304 Soft Stainless Steel Head.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340g	Double Bend	RH or LH	2.5

AVAILABLE IN PINK.

RECOMMENDED FIT: *Straight Back-Through*

# Olivia

Face-Balanced Mallet

**FEATURES:** Variable Weighting System. Three Squaring Lines. Double Bend Steel Shaft.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340-355-370g	Double Bend	RH	2.5

340-355-370g Weighting Sets

**RECOMMENDED FIT:** Straight Back-Through

# Victoria

Face-Balanced Cavity Back Mallet

**FEATURES:** Perimeter Weighted. Unique Head Design & Sight Lines. Double Bend Steel Shaft. Titanium Carbon Finish.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	340g	Double Bend	RH	2.5

**RECOMMENDED FIT:** Straight Back-Through

# Victoria II

Face-Balanced, Cavity Back Mallet

**FEATURES:** Perimeter Weighted. Unique Head Design, Single Sight Line. Double Bend Steel Shaft. Available in Pink.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	370g	Double Bend	RH or LH	2.5

**AVAILABLE IN  
CENTER-SHAFTED  
BELLY AND LONG.**  
See Specifications on page 22.

**RECOMMENDED FIT:** *Straight Back-Through*

# Tiffany

Sight-Aligned, Face-Balanced

**FEATURES:** High Moment of Inertia. Titanium Carbon Finish. 304 Soft Stainless Steel Head.

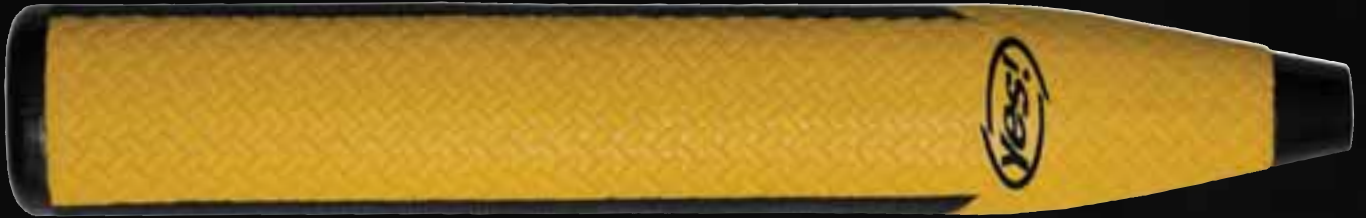

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	350g	Double Bend	RH	2.5

**AVAILABLE IN PINK.  
AVAILABLE IN  
CENTER-SHAFTED,  
BELLY AND LONG.**  
See Specifications on page 22.

**RECOMMENDED FIT:** *Straight Back-Through*

# BigLite Fat Grip

*BigLite is the first and only, super light-weight, super jumbo putting grip that does not change the swing-weight of your putter.*

- 1. Reduces Grip Pressure
- 2. Eliminates Wrist Breakdown
- 3. Keeps Putter Head Square

INSTANTLY IMPROVES YOUR PUTTING

## Natalie

*Center-Shafted, Sight-Aligned*

**FEATURES:** Face-Balanced. Long Sight Line. Large Head for Maximum Forgiveness. 304 Soft Stainless Steel Head.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Center	RH or LH	2.5

**AVAILABLE IN  
BELLY AND LONG.**  
See Specifications on page 22.

RECOMMENDED FIT: *Straight Back-Through*

# Carolyne

*Center-Shafted, Face-Balanced*

**FEATURES:** Center-Shafted. Large, Forgiving Head.  
304 Soft Stainless Steel Head.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Center	RH or LH	2.5

**AVAILABLE IN  
BELLY AND LONG.**  
See Specifications on page 22.

**RECOMMENDED FIT:** *Straight Back-Through*

# Hanna

*Center-Shafted, Face-Balanced*

**FEATURES:** Large, Forgiving Head. Long Sight Line.  
Toe-Heel Weight Distribution.

LENGTH	HEAD WEIGHT	SHAFT	RIGHT/LEFT	LOFT
Regular 32"-37"	355g	Center	RH	2.5

**RECOMMENDED FIT:** *Straight Back-Through*

**MSRP:** \$190.<sup>00</sup>

## Grips

*Yes! Golf uses only premium grips for all C-Groove putters.*

### Standard Length Putters

*Tri-colored black, white and yellow Winn AVS*

### Pink Models

*Pink Winn AVS*

### Callie-f

*Winn AVS black*

### Belly Putters

*Winn Tri-color one-piece*

### Long Putters

*Winn Tri-color split*

## Cleaner

*Keep your grips clean and tacky.*

## Putter Head Covers

*Putter head covers come standard black or pink. Customize your C-Groove putter with a purple, white, yellow, blue or red tour head cover. All covers feature magnetic or velcro closures depending on model.*

*Regular Covers*

*Forged Model Covers*

## Guide

*Putting – The Complete Guide DVD World famous putting expert Harold Swash shares his philosophies and Tour-proven coaching methods that will help you develop a better putting motion and lower your scores.*

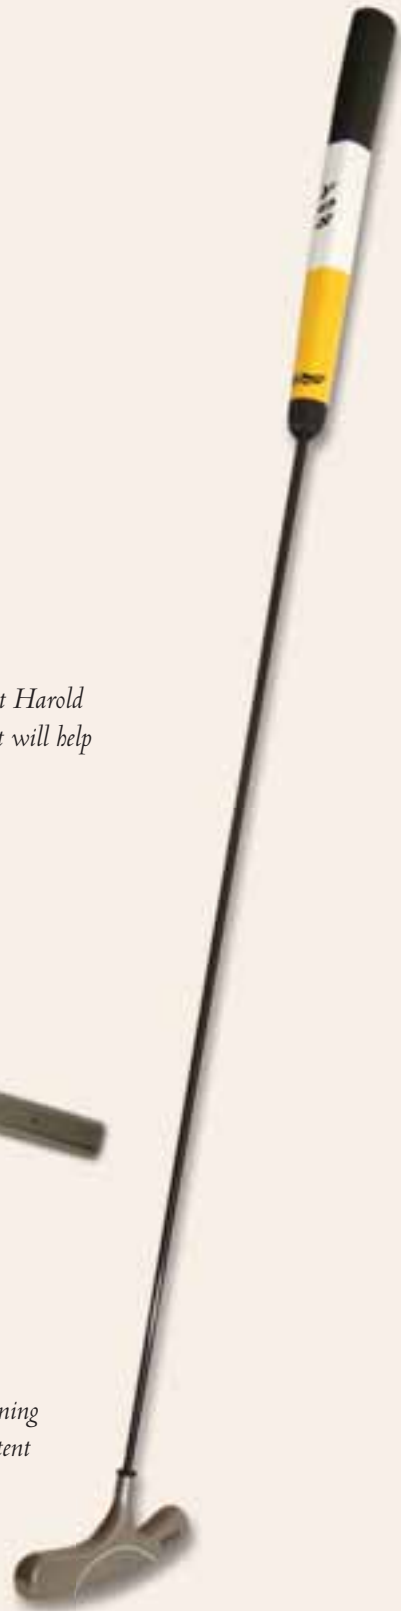

## The Rail

*The Rail will help you with clubface alignment through the “bitting area” to improve your putting accuracy, focus and concentration. Putt down the top of The Rail for instant feedback on your stroke.*

## Rhythmiser

*The ultra-flexible shaft on this simple but effective training putter will quickly develop perfect rhythm and a consistent pendulum motion in golfers of all levels.*

## Bags

*The official staff bag of YES! Golf professional tour players is now available to all golfers.*

*Stand Bag*

*Cart Bag*

*Tour Bag*

# (PLUS THREE MORE IN THE WORKS.)

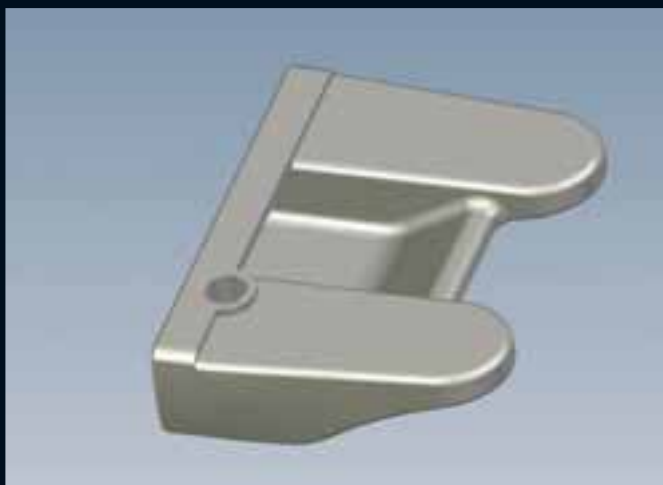

*Unlike some, our new model release dates are based on the product's readiness, not the calendar. Inception to introduction can take several months, even years.*

*Witness three new designs that were not quite finalized when this supplement went to press. They are our current intense focus and will be available in two to three months.*

## Athena

*Appropriately named after the Greek Goddess responsible for the creation of metal-crafted weapons. This Athena will feature:*

- *MOI head construction. Body of 431 Stainless steel and hybrid hollow head design.*
- *Center of Gravity placed well back from face for optimal MOI/weight ratio and superior ball roll.*
- *Double bend shaft, half shaft offset.*
- *Face balanced design and C-Groove technology.*
- *Head weight 350g.*

## Gina

*A new toe-down design with classic cavity-back for the purist.*

- *One-piece cast construction featuring chrome-plated 304 steel and blast finish.*
- *Cavity-back has squared off dimensions for easy alignment.*
- *C-Grooves and putter sole are bright chrome.*
- *Over hosel shafting.*
- *Head weight 355g.*

## Sandy

*A compact mallet design with streamlined double delta back for quick alignment reference and higher MOI.*

- *One-piece cast construction with chrome-plated 304 steel and blast finish.*
- *Classic cavity-back design with squared off dimensions for easy alignment.*
- *C-Grooves and putter sole are bright chrome.*
- *Double bend shaft, half shaft offset.*
- *Face balanced design.*
- *Head weight 355g.*

# LIKE THE ADVANCED DESIGN WE JUST PERFECTED.

*Call us obstinate, but nothing rushes our product development. Least of all a printing date. So we present herewith an exciting new model that was almost*

*finished as our 2008 catalog went to press but needed a bit more refining. The GrooveTube™. It's now perfect. And worth the wait.*

*The GrooveTube. Like a club and putting aid all in one. True 3-D overhead alignment uses an elevated sightline window and a heads up centering line to verify correct setup position. Swing path ghost imaging allows golfer to visually simulate the stroke with practice swings. With its synergistic balance and feel, not to mention of course, our proven C-Groove technology, the GrooveTube imparts an instant sense of confidence and pays it off with greater accuracy.*
